Summary

1-st training in the framework of WP5 of LaMANCHE project took place at NTU “KhPI” on February 20, 2014. The title of the training: “Leadership in higher education: practical aspects of internationalization”.

The internationalization aspect is chosen as it is one of the University’s strategic goals. Due to the same reason this topic was selected for the case writing in WP3. Since NTU “KhPI” is the leader of the region in internationalization processes, it targets further improvement of its position and strengthening of the competitive advantage in this area. In order to achieve that NTU “KhPI” engages a group of academic and administration employees, part of which already holds leading positions and the rest works on achieving that. The group unites high and mid level management representatives, which aim at promoting internationalization ideas at all levels in local and international community, and at generating thoughts, writing grant applications, searching for potential international partners as a grass roots initiative. So the target audience of the training consisted of deans, deputy deans, deputy chairs and their assistants representing the described internationalization group.

Apart from the trainers, Olena Reshetnyak, Taras Danko and Anastasiya Makarenko, NTU “KhPI” internationalization leaders made presentations, shared their experience and thoughts on leadership in higher education at the training. Other trainees also took part in discussions and generated ideas regarding further enhancement of leadership in higher education at the university.

The report includes lists of participants, presentations, filled out evaluation forms, photos taken at the training, summary of the training, screenshot of training announcement in Ukrainian with the translation into English.
